

**SENTIENT FLIGHT GROUP TO IMPLEMENT AviIT'S eMan
TECHNICAL PUBLICATION MANAGEMENT SOLUTION**

AviIT, Inc. a leading provider of specialist aviation software solutions is pleased to announce that the Sentient Flight Group (Sentient) has selected AviIT's "eMan" technical publication management solution for immediate implementation by Sentient's maintenance organization.

After a comprehensive evaluation process, Sentient chose AviIT's eMan solution because of its ability to provide easy access to all aircraft technical publications, OEM manuals and websites from a single centralized location, substantially improving operational efficiency for all users. eMan also provides a comprehensive set of library management tools that reduces administrative and IT workload as well as ensuring complete version control of all aircraft maintenance documents. The deployment of eMan will reduce publication costs by eliminating unnecessary duplication of information.

"eMan will allow us to provide more efficient, higher quality services to our customers by ensuring everyone within our national maintenance organization has access to only the current revision of any technical publication, manual, service bulletin, or other electronic file from a single-centralized location," said Thomas Mealie, Senior Vice President of Maintenance, Sentient Flight Group.

Vince Doherty, Vice-President of AviIT, Inc. stated, "We are extremely pleased to have successfully demonstrated the eMan solution, and to have earned the trust of Sentient Flight Group. We look forward to working closely with them and continuing to offer value and ongoing support".

"Sentient Flight Group joins an ever growing list of notable eMan clients as we continue to offer our proven product solutions and services to the commercial and general aviation industries", said David Brown, CEO of AviIT.
